Just Another Day At Accenture

Jeffrey Consultant

“Today I’m getting some practice in before work since I have a symphony performance tonight. A few more pieces, then I’ll hop on the train.”

Heather Analyst

“Since I’m at the Accenture office today I’m using the telepresence room for my usual 7:00 am call to the development team in India.”

Chloe Senior Executive

“My day starts at 6:00 am with a work out with my trainer, then I come home and I get my daughter ready for pre-school by 8:00 am and then I either go to one of the Accenture offices or go to visit one of my clients. Today is a great day because I get to go to both places.”

Andrew Consultant

“I like to sync my calendar on the way in. Every day is different, so I check to see what I have going on.”

Jason Manager

“In the morning I feed my son breakfast, I load my bike into the car so that I can go riding later on that day. I train for triathlons so I ride or run at least once or twice a week.”

Jeffrey Consultant

“I catch up on emails and anything that came up overnight. Then I plan out my day. Currently I’m working on service transformation for a customer call center in Canada. We’re helping them make their contact center more efficient by training and recruiting their agents who are also looking for ways to save money. My manager is in Minnesota and the other consultant is in Calgary. We seldom see each other face-to-face, so sometimes we’ll take a picture out the window of where we’re sitting.”

Chloe Senior Executive

“It’s 9:15 am and I’m meeting with each of my team leads. I’ve got a team of over thirty five people and I’ve got seventeen leads and so each of the teams are focusing on different areas of cost savings for my client. It’s a supply chain project and we’re saving the client over a hundred million dollars.”

Andrew Consultant

“I work with emerging technology. Right now its ten o’clock and I’m meeting with project team mates in our research labs in France and India to actually discuss how we can do remote collaboration better. My job in tech labs includes some very technical development work but also involves planning and business strategy work. There’s certainly a part of being a technology evangelist that I really like but I also enjoy demonstrating how it can be used for business purposes.”

Heather

Analyst

“We are developing and deploying training to thirty five thousand end users. It’s one of the largest training implementations Accenture’s done to date. I’m working with twelve off-shore developers to build the web based training courses based on course specifications that meet the client’s objectives.”

**Jason
Manager**

“My specialty is Siebel, a customer relationship management application that Accenture configures and implements for clients. We start with design sessions with the clients to make sure that the proposed system designs meet their business needs. Then I review the designs with the development team making sure that they can build exactly what the client needs.”

**Chloe
Senior Executive**

“Yesterday I had a call with the world wide supply chain leadership team and I was able to gather ideas that I can take back to my client. So I’m meeting with my client to share with them different areas where we can help improve their supply chain organization.”

**Andrew
Consultant**

“As a volunteer project I’m the lead for the Chicago eco team. We aim to build knowledge and help people at Accenture understand what sustainability is all about. We’ve launched a national blog for the eco program where different employees post topics they’re passionate about. We plan events that help people learn more about sustainability and what Accenture’s doing to be more green.”

**Jason
Manager**

“I’m having lunch with a couple of summer interns. When I was an Accenture intern I helped develop a new system for a government agency. Ten years later I can still remember what it was like to be a new intern so I thought I would give some advice about the ins and outs of client work. “

**Heather
Analyst**

“The development team has posted a question on our share point site. We want a flawless training course to deliver to the client so I am now helping the developers make the right changes in the learning management system.”

**Jeffrey
Consultant**

“Today I am taking part in an employee podcast featuring my previous project in Singapore as a best practice for other project teams. The purpose of our study was to measure key metrics trending when we force our call centre agents to be one hundred percent compliant. So I’ve actually had a lot of international experience for someone who hasn’t been around Accenture for a very long time.”

**Andrew
Consultant**

“I’m having coffee with a new analyst in our group. I met our new joiners both before and after they join the firm. They say at Accenture you work as a family, and for me it really is as both my brother and sister-in-law worked for Accenture. They really influenced my decision to come here. When I first joined I had three trips to Europe right away, one for a conference in Geneva and two for project work

in Frankfurt, Germany. That definitely made me feel like I was in the real world and my expertise was valued. Now I like to share my experience with others who are just starting.”

Chloe
Senior Executive

“I’m a board member at Hands On Atlanta and that’s part of my civic responsibility. Once a month I go down to Hands On Atlanta and the board gets together and comes up with strategic ways that we can make a positive impact on the Atlanta community.”

Heather
Analyst

“Opportunity to volunteer through Accenture is vast. I currently volunteer for The Cara Program, which provides critical support, training and job placement to people, affected by homelessness and poverty. Accenture volunteers are helping develop several supplemental training courses for the organization. I’m personally responsible for developing and delivering two of these courses. Volunteering has been helpful in building my personal network so I am getting to apply and enhance my skill set while contributing to this incredible organization.”

Jeffrey
Consultant

“It’s around four o’clock so I’m headed off to the symphony. My project allows me to work a flexible schedule so I can leave early to make rehearsal. Since we have some concerts coming up I find it great that I can find time in my schedule to do the things that I love.”

Chloe
Senior Executive

“Typically I leave work around five pm and then I go pick up my daughter from day care. I make her dinner, put her to bed and then I go back and do some more work for about an hour or two.”

Andrew
Consultant

“I usually head out about five thirty and here at tech labs we’ll go play basketball with co-workers one night a week.”

Jason
Manager

“Got an email about tonight saying the client team are getting together for a bike ride.”

Heather
Analyst

“Soon I may have the chance to go to India for several days. The potential to go to India with less than one year of post college experience in order to work with developers that I’ve been mentoring for the last ten months is truly unmatched.”
